INSTALLING ANACONDA

PURPOSE

As required for the hands-on session for learning to program with python.

This is an essential requirement for the 'Genpact Gold Program- ML with Python' session

HOW TO GET IT!

- Point your web browser at the page: https://www.anaconda.com/download/
- Download the latest version of the Windows installer -- which was Anaconda 5.3 Installer –Windows/Mac/Linux
- After downloading just double click the installer exe and follow the prompts.
- It will by default install in the directory Anaconda3.7 in your home directory and will offer to add the anaconda bin directory to your PATH variable.

WHY ANACONDA

- It is a very nice collection of the most important Python packages

- Package management using conda is excellent

- It has some optimized numerical libraries linked with the latest Intel MKL libraries

- It has a Data Analytics and numerical computing focus

- They support NUMFOCUS

- It's an Open Data Science platform

- It is also a very good "R" platform

- It by default installs to your home directory and doesn't interfere with any other Python install you may have.

- It is easy to install!
